

# NEW DEFENCE TENDERS THIS WEEK: 9 August 2018

## DELIVER THE NEXT GENERATION ARMY CAPABILITIES (INCLUDING DEMONSTRATION AT ARMY INNOVATION DAY 2018)

### HUB-18-AID-001

#### - Notice -

The Department of Defence via the Defence Innovation Hub (Defence) is seeking innovation proposals that will assist Defence to deliver the next generation Australian Army. Defence is establishing a next generation Australian Army that is prepared for both current and future threats through a combination of concepts, organisation and technology offsets. That is, an Army that is a fully integrated component of the joint force, capable of fighting and winning through its employment of networks, systems and sensors across all domains. In delivering the next generation Army, Defence is particularly interested in innovative solutions relating to the following two innovation themes:

Theme 1: Robotics and Autonomous systems (RAS) in the Combat Team. Armoured vehicles and dismounted combatants need to rapidly transfer and present information in a usable, cognitively manageable way to reduce risk of information overload particularly when prosecuting fleeting targets. Defence is also seeking innovative ideas to reduce human involvement in the combat team's engagement and decision cycle using robotics and autonomous systems.

Theme 2: Disruptive effects in signature management. Protecting individual soldiers, static and mobile platforms as well as combined arms teams is critical to the success of Defence operations. Defence is seeking innovative ideas to obfuscate signatures or create uncertainty in attempts to geo-locate.

This Call for Submissions is Stage 1 of a two-stage procurement process. Defence's objective in this Call for Submissions is to select up to 20 respondents to participate in the Request for Proposal process (Stage 2). As part of Stage 2 assessment, respondents will be invited to display their innovations at Army Innovation Day 2018 (AID18) on 25 October 2018.

Defence's objective, following Stage 2, is to select a number of respondents to enter into an Innovation Contract with Defence to deliver a prototype of the technology for user trial and evaluations with the Australian Army within 12 months after AID18. If your technology will not be ready in this timeframe, you should not respond to this Call for Submissions and may instead prefer to submit a proposal to the Priority Innovation Notice at <https://www.business.gov.au/Centre-for-Defence-Industry-Capability/Defence-Innovation-Portal>.

Army Innovation Day 2018 (AID18) will be held on Thursday, 25 October 2018 at the Adams Auditorium, at the Australian Defence Force Academy in Canberra ACT, Australia for a period of one day. The purpose of AID18 is for selected respondents to display and pitch their proposed innovations to assessors, Capability Managers and Defence Innovation Hub personnel. Respondents may also be able to provide clarification to assessors about their proposed innovation. The request for proposal terms (separate to these Call for Submission (CFS) terms) will govern the respondents' participation in AID18.

AID18 is open to Defence personnel, Defence contractors (and any invited guests) and the media. Invitations will be extended to the Minister for Defence, Senator the Hon Marise Payne and the Minister for Defence Industry, the Hon Christopher Pyne. Service chiefs, Defence group heads, senior Australian Defence Force officers responsible for capability development and senior officers

at the Australian Federal Police, the Australian Border Force and Home Affairs may also attend. Submissions to this CFS can be made using the "Special Notice Call for Submissions Smart Form" available from the Defence Innovation Portal.

Further to Industry communications which identified a third theme, Network centric Soldier, Defence plans to release a separate Special Notice for this theme at a later date.

CFS Criteria - a) Suitability b) Feasibility c) Timeliness d) Contribution to Australia's Defence industry capability.

RFP Criteria - a) Suitability b) Feasibility c) Timeliness d) Contribution to Australia's Defence industry capability e) Cost – The cost of the proposed innovation, including contract price, Defence items and any other costs to Defence f) Organisational Capability and Capacity: i. the extent of the project management capability of the respondent, and appropriateness of any proposed or existing governance arrangements; ii. financial and corporate viability of the respondent; and iii. previous performance of the respondent in delivering similar projects or services.

## COMMERCIALISATION OF DEFENCE FUEL INSTALLATION - HMAS CAIRNS, QLD

**FSB/DFS/2018/02-1**

**24 SEP**

*- Notice - Defence Support and Reform Group*

Defence seeks proposals from industry to engage in a commercial arrangement for the provision of Marine Diesel Fuel (MDF) supply and services in Cairns, Qld. Under such arrangement, Defence would grant a commercial entity the right to use the Nominated Area for its commercial benefit subject to the terms of the Contract including ongoing obligations to Defence of management, operation and maintenance. This is a pre-release notice of an upcoming Defence tender activity to be conducted as a two-stage procurement. Following the Request for Proposal (RFP) process Defence intends to conduct a Request for Tender inviting submissions from shortlisted respondents of the RFP to procure the requirement described in a Statement of Requirement.

This Notice supersedes previously pre-released notification FSB/DFS/2018/02 published on 27th April 2018.

**Closing Date:** 12:00 PM Monday 24 September 2018

## LAND C3 PROGRAM BRIEF TO INDUSTRY - LAND 200 PHASE 3 - BATTLEFIELD COMMAND SYSTEMS (TRANCHE 3)

**CASG/CD/IB0206/18**

**24 AUG**

*- Industry Briefing - Capability Acquisition and Sustainment Group*

The Land C3 Program will provide a brief to industry on the Land 200 Battlefield Command Systems (BCS) program and the objectives of Land 200 Phase 3 on Tuesday 4 September between 8:30am and 9:50am.

Defence will present project details to industry and conduct one on one meetings in conjunction with the Land Environmental Working Group and Land Forces Conference in Adelaide in September 2018. The purpose of the brief and meetings is to provide industry attendees with accurate and consistent information including an overview of the project scope and objectives. Defence intends to gather information, and analyse industry capability and capacity to provide support to Land 200 Phase 3, including development, manufacture, integration, supply, adaptation, sustainment and disposal of the BCS. This will also provide an overview of how Defence intends to foster a more productive and enduring relationship with industry as a partner for the BCS capability. Land 200 Phase 3 is scoped to deliver the ADF the following capability elements:

- Expansion of the BCS across Army and to select Navy and Air Force elements
- A Beyond-Line-of-Sight Communications capability
- Dismounted BCS capability (including hardware and communication equipment, not including BMS software)
- Radio modernisation
- A data interface with Joint and Coalition systems
- Technology refresh

Estimated Value:

- Acquisition: \$1B – \$2B (Middle of band)
- Sustainment: \$60-90m annually averaged over 15 years

The brief will be unclassified and a separate opportunity for one-on-one discussions will be available.

**Industry Briefing:** An Industry Briefing will be held at **Adelaide Convention Centre, Adelaide, SA from 8:30 AM to 9:50 AM on Tuesday 4 September 2018**. Tenderers must contact the Enquiries Officer by email, by 4:30 PM on Friday 24 August 2018 if wishing to attend.

## ARMY RESEARCH SCHEME 2018 SUBMISSIONS

### ATM\_6559\_ARMY\_AHQ

11 SEP

- Request for Proposal - Defence Support and Reform Group

The Australian Army Research Centre is seeking service providers to undertake paid research on topics that will inform future land force development and modernisation. The research outcomes sought are either articles (3,000 to 5,000 words) or stand alone papers (10,000 to 20,000 words). Army will facilitate publication of research in the first instance in either the Australian Army Journal or the Army Research Papers Series. Topical areas of current research interest to Army include:

Question 1: What is Australian industry's capacity to support mobilisation for major war?

Question 2: How will Australia's land forces conduct Joint Land Combat to win wars?

Question 3: What are the future strategic partnership options for Australia?

Question 4: Can a middle power have an offset strategy?

Question 5: How can the joint land force contribute to operations less than war in an age of constant competition?

**Estimated Value:** From \$0.01 to \$80000
