

## NEW DEFENCE TENDERS THIS WEEK: 19 March

### JOINT PROJECT (JP) 9102 AUSTRALIAN DEFENCE SATELLITE COMMUNICATIONS SYSTEM

**JSD/NOT/12477/3****28 JUL**

*- Notice - Capability Acquisition and Sustainment Group*

This notice provides updated information regarding the Joint Project (JP) 9102 (Project) in respect of the proposed Industry Briefing (and one-on-one discussions with potential prime contractors), which was planned to be held on 2 April 2020, in conjunction with the timing of the 36th Space Symposium (30 March – 2 April 2020) in Colorado Springs, Colorado, USA. With the recent postponement of the Space Symposium and as a result of travel restrictions relating to the Coronavirus/COVID-19 pandemic the Industry Briefing is cancelled. The Project intends to reschedule the Industry Briefing (and one-on-one discussions with potential prime contractors) at a suitable opportunity.

**Closing Date:** 3:00 PM Tuesday 28 July 2020

**Enquiries:** Project Director JP9102, Email: JNT.9102@defence.gov.au

**Copies of Notice:** [www.tenders.gov.au](http://www.tenders.gov.au)

### COUNTER IMPROVISED THREAT GRAND CHALLENGE PHASE 2: INTEGRATION

**CIT - GC PH2****20 APR**

*- Request for Proposal - Defence Support and Reform Group*

The Counter Improvised Threat Grand Challenge (CIT - GC) of the Next Generation Technologies Fund is entering a Phase 2 challenge aimed at realising leap ahead technologies for Countering Improvised Threats by research, engineering and development in Australia. The improvised threats facing Australia and our coalition partners have a number of features that range in complexity and can now operate in all environments (under or on the surface of sea, beneath and on land and in the air). Threat actors who design and manufacture improvised threats can exploit available technologies or create specific, purpose developed technologies for control, deployment, initiation and kinetic effect. The improvised threat is dynamic, and is evolving rapidly to improve performance or in response to countermeasures. These features dictate that a next generation Counter Improvised Threat system must in turn be able to detect a wide range of threats and then match and employ suitable effectors under appropriate response control systems. A Counter Improvised Threat system needs to be agile and capable of fast evolution. The Grand Challenge is to demonstrate an integrated system that can detect and neutralise improvised threats on a complex joint battlespace with minimal risk to Defence personnel and civilians.

## LAND 154 PHASE 4 - PERSONAL FORCE PROTECTION ELECTRONIC COUNTERMEASURES

**RFI/JSD/9668/1**

**24 MAR**

*Ext. From 17 Mar*

*- Request for Information - Capability Acquisition and Sustainment Group*

Personal Force Protection Electronic Countermeasures (Personal FPECM) is a capability to protect individuals from Remote Controlled Improvised Explosive Devices (RCIEDs). Personal FPECM is part of the Land 154 Joint Counter IED Program Phase 4. The Capability Manager (Army) is seeking Personal FPECM for use by Australian Defence Force (ADF) personnel in operational areas where RCIEDs are a threat. Users for Personal FPECM may include personnel in Army, Special Forces, RAAF and Navy. The RFI is intended to provide the project with information about the:

- maturity of the Personal FPECM market, and
- functionality and form factor (size, weight, power) of developmental and off-the-shelf systems/products.

The project team will conduct a security risk assessment on the respondent (as a company) to determine if the respondent may receive the Unclassified FOUO documents. The Commonwealth has the right to deny access to these documents. More information about this access process is in the Conditions of RFI. The project intends for RFI responses to be from the original equipment manufacturers or authorised resellers.

**Closing Date:** 3:00 PM Tuesday 24 March 2020

## CAPABILITY LIFE CYCLE MANAGER

**MSD/RFT/12626/1****24 APR**

- *Request for Tender - Capability Acquisition and Sustainment Group*

The Department of Defence is seeking to procure Capability Life Cycle Manager (CLCM) services in support of the SEA 1180 Offshore Patrol Vessels (OPV). The CLCM will conduct assurance and capability stewardship services during the acquisition and sustainment phases of the OPV Capability Life Cycle, as well as ensuring a smooth transition into service. The term of the CLCM Contract will be a maximum of seven (7) years and will be split up into a number of phases. The first phase is the Assurance and Planning Phase (1 year), with the primary objective of ensuring the integrity of OPV Support System Technical Data. The second phase is the Acceptance and Delivery Phase (3 years), which includes acceptance of the initial tranche of OPVs into sustainment. The

third phase is the In-Service and Delivery Phase (3 years), which involves the long-term stewardship of the OPV Capability. The CLCM will be located in and perform the services in WA.

**Industry Briefing:** Defence would like to advise that the OPV CLCM RFT Industry briefing, which was scheduled to occur on Monday 16 March 2020 in Perth, was cancelled due to the potential impacts of the coronavirus (COVID-19) and travel restrictions imposed on a number of companies. The OPV Transition Team apologises for any inconvenience caused. To ensure the timely provision of the briefing information, Defence will release an Addendum to MSD/RFT/12626/1 by COB 18 March 2020 which will contain the Industry briefing presentations, talking points and additional supporting material (including responses to questions already received by the OPV Transition Team). Defence wishes to ensure that no tenderers are disadvantaged by travel restrictions or concerns surrounding COVID-19.
