### PROTECTIVE DNS FOR THE AUSTRALIAN CYBER SECURITY CENTRE

**ITR 9445/2019****18 MAR**

#### *- Request for Information - Australian Signals Directorate*

Project WINTERROSE is a project established to deliver a managed protective DNS capability for both internal and external Australian Cyber Security Centre (ACSC) customers that will contribute to the ACSC Mission to uplift the whole of Australia security posture by reducing the volume of known and likely malicious intrusions. The protective DNS capability will block known malicious indicators, provide information to customers to improve their security posture, and provide information to the ACSC to improve the Cyber Security mission. Project WINTERROSE will be delivered in two phases.

Phase one is proposed to be a pilot covering 10-15 organisations with the intent of completing a feasibility study for approximately 3 months to provide quantitative data to the ACSC to determine the feasibility, costs and benefits of upscaling these efforts to protect all levels of Australian government and key systems, including critical infrastructure.

The scope of this work is as follows:

- A protective DNS that blocks malicious threats based on the threat feeds it receives; it will Log the details and send to a sinkhole service.
- An Analytics engine that can validate threat feeds, and report on logs
- Support services including ITIL service management functions

Phase two is dependent on the outcome of phase one, and is proposed to scale to all levels of

Australian government and key systems, including critical infrastructure and is proposed to include the addition of an internet facing Self-service Portal that allows users to sign up, configure and receive reports on the service.

## COMPANY OPPORTUNITIES

### NAVAL GROUP - FUTURE SUBMARINE

**27 MAR**

- *Expression of Interest - Naval Group*

Future Submarine Program

The Program seeks to establish the Australian industrial capability necessary to support the build, operation and sustainment of the Future Submarine. This will involve maximising the involvement of Australian industry in all phases of the Program without compromising capability, cost, schedule

or risk.

Australia's Future Submarines will be built in Adelaide, Australia. The first submarine will commence service in the early 2030s with construction of the last submarine in the 2050s. Sustainment will continue into the 2080s.

Naval Group Australia is seeking EOI from leading Australian engineering companies to perform and project manage the detailed design, procurement, installation and commissioning of the Platform Land Based Test Facility (PLBTF) being provided to the Commonwealth of Australia (CoA) for the SEA1000 Future Submarine Project.

The PLBTF is a test bench that will be located at the shipbuilding precinct in Osborne, SA, where the main propulsion systems will be integrated and tested prior to the build of the First of Class (FoC) submarine.
