

NEW DEFENCE TENDERS THIS WEEK: 27 February

DEFENCE WAR COLLEGE ACADEMIC AGREEMENT

RFT 12669/JCG/ADC**31 JUL**

- Notice - Defence Support and Reform Group

This advanced notice to all Australian Universities or Overseas Universities (as defined by the Higher Education Standards Framework (Threshold Standards) 2015) that the Australian War College (War College), as part of the Australian Defence College (ADC), intends to approach the market in July 2020 to solicit responses via a Request For Tender (RFT). The War College aims to establish a long term agreement for academic services and associated support services to the War College, enabling world class residential courses, distributed learning, research, seminars, and professional journals, supporting delivery of joint professional military education to Defence from January 2023. Mastery of the profession of arms is a critical warfighting edge for the Australian Defence Force. The ADC advocates for professional mastery to nurture the desire of our people to achieve professional excellence and has a pivotal role in contributing to building the Australian Defence Force future force. To achieve this, the ADC delivers world-class joint professional education and joint individual training that is future focused, preparing military leaders intellectually for future digital age warfare. The War College is responsible for the delivery of joint professional military education and provides a range of courses in both residential and distance learning format. Students attending the War College comprise Australian Defence Force personnel, Australian Public Servants from Defence and other agencies and international military personnel.

Closing Date: 4:30 PM Friday 31 July 2020

PROVISION OF CHEMICAL, BIOLOGICAL, RADIOLOGICAL AND NUCLEAR PERSONAL PROTECTIVE EQUIPMENT

HOMEAFFAIRS/2039/RFT

20 MAR

- Request for Tender - Department of Home Affairs

Department of Home Affairs is seeking tenders from suitably qualified contractors to provide Chemical, Biological, Radiological and Nuclear (CBRN) Personal Protective Equipment. The implementation of this capability is dependent on respiratory protection and skin protection. The CBRN protective ensemble includes CBRN protective garment, over-boots and gloves. Law Enforcement units are required to undertake activities including tactical operations, search and render safe devices or persons within hazardous CBRN environments. These hazardous environments may range from enclosed and open spaces that include:

- a chemical vapour hazard only, to a combination of a vapour hazard and liquid or solid contact hazard;
- Biological hazard that may be aerosol, solid, or liquid; and
- radiological or nuclear hazard that is vapour, liquid or solid.

The likely exposure of the operator is to low levels of vapour or liquid CBRN hazards, where concentrations are below the Immediately Dangerous to Life and Health (IDLH) permitting the use of Air Purifying Respirators (APR). However, direct contact with a liquid cannot be discounted. The CBRN protective ensembles will be used by operators to undertake a variety of activities within hazardous areas. These may include but are not limited to: search, rescue, assaults, breaching, or render safe of a device. The operator may be exposed to CBRN agents and these ensembles may be used in tactical operations within harsh environments. The CBRN ensembles must be designed and constructed to withstand operations within the harsh CBRN tactical environment and is designed to protect the head, torso, hands and feet. This includes but is not limited to design, protection against CBRN agents, integrity including robustness against impact, puncture or tear,

ease of use, and stealth. The key capability enabler for these operational groups is CBRN protective garments. These garments include: over-boots, glove and CBRN protective garments. The garments can range from permeable carbon impregnated ensembles, to permeable GORTEX type ensembles, to impermeable garments. These garments are intended to protect officers who come into contact with CBRN agents that are dermal hazards

Closing Date: 2:00 PM Friday 20 March 2020

Enquiries: Ian Marshall (Capability Coordinator), Email: anzctc.procurement@homeaffairs.gov.au

Email: myrna.garciadearce@psba.qld.gov.au

Copies of ITO: <https://qtenders.hpw.qld.gov.au/qtenders>

RADIO COMMUNICATIONS

ASA RFI 190063

26 MAR

- Request for Information - Airservices Australia

Airservices Australia is seeking information from the market in order for Aviation Rescue and Fire Fighting Services (ARFFS) to gain a better understanding of industry capabilities and to identify and refine potential capabilities, options and solutions specifically in relation to the provision of radio communications systems that may be suitable for provision of services to meet ARFFS requirements. There are three (3) categories of equipment / services for which information is requested:

- UHF (Ground - Ground) Communications;
- VHF Airband Communications;
- VHF Marine Band Communications.

Closing Date: 2:00 PM Thursday 26 March 2020

Enquiries: Donna Keough, Email: Procurement_ARFF@airservicesaustralia.com

Copies of RFI: www.tenders.gov.au

UNMANNED VESSELS FOR SAR

20AMSA027

27 MAR

- Expression of Interest - Australian Maritime Safety Authority

The Australian Maritime Safety Authority (AMSA) uses aircraft to deliver a range of survival and communication aids to people in distress. Typically these are dropped under parachute by our Challenger jet aircraft in a configuration that is designed for low level drop (200 ft by day over

water). In many conditions, satisfactory accuracy can be achieved. However, in circumstances where the aircraft has to drop from higher altitude, such as at night, it becomes very difficult to deliver stores accurately such that they can be recovered by the person in distress. AMSA is exploring options for precision delivery of stores by means of remote guidance systems, including using unmanned vessels that can be deployed from aircraft

Closing Date: 2:00 PM Friday 27 March 2020

Enquiries: Chris Evans, Email: contracts-enquiries@amsa.gov.au

Copies of EOI: www.tenders.gov.au

COMPANY OPPORTUNITIES

DIESEL GENERATOR EXHAUST DIFFUSER DESIGN AND MANUFACTURE

201**18 MAR**

- Expression of Interest - Naval Group

The Program seeks to establish the Australian industrial capability necessary to support the build, operation and sustainment of the Future Submarine. This will involve maximising the involvement of Australian industry in all phases of the Program without compromising capability, cost, schedule or risk. Australia's Future Submarines will be built in Adelaide, Australia. The first submarine will commence service in the early 2030s with construction of the last submarine in the 2050s. Sustainment will continue into the 2080s.

Expressions of Interest are being sort for the design and manufacture of a system to diffuse exhaust gases from the diesel generators under water for use on the Australian Future Submarine. The Diesel Generator Exhaust Diffuser is located outside of the pressure hull.

Closing Date: Wednesday 18 March 2020

Enquiries: Jeremy Satchell, Tel: (08) 8429 2990, Email: jeremy.satchell@sa.gov.au

Or: Jeff Camburn, ICN SA, Tel: (08) 8303 2054, Email: jeff.camburn@sa.gov.au
