## PACIFIC MARITIME TRAINING SERVICES

**MSD/RFT/12977/1A**

**30 JUN**

*- Request for Tender - Capability Acquisition and Sustainment Group*

Under the Defence Cooperation Program (DCP) the Australian Government is gifting 21 Guardian Patrol Boats (GPBs) to 12 Pacific Island Countries and Timor Leste. The GPBs are replacing the existing Pacific Patrol Boats that have been in-service since 1987. The first GPB was delivered in 2018 with the last scheduled for delivery in 2023, with a GPB scheduled for delivery approximately every three (3) months. As of April 2020 six (6) PPB-R have been accepted and delivered to their recipient nations.

The GPBs are being built in Australia, to a commercial standard (USL Code 2A) and are used for sovereignty protection, maritime surveillance and other national purposes including search and rescue and disaster relief. Under the Pacific Maritime Surveillance Program the Commonwealth has also taken responsibility for arranging Training Services for the crews of each of the GPB.

The new training contract will provide all of the maritime technical, seamanship, communications and management courses in support of the GPB program. Training will cover technical and non-technical training courses for personnel of different nationalities, ranks and experience, to equip them with the knowledge, skills, and aptitude necessary to safely crew, manage and maintain a GPB. The Contract will also provide for Pastoral Care Services for trainees including travel administration, campus accommodation, all meals, sporting and other facilities, and administrative and 24-hour welfare support on an as required basis.

The contract is for an initial five (5) year period from January 2021 with three (3) x three (3) year extension options.

## PHYSICAL SYSTEM SECURITY SOLUTION

**19893****26 MAY**

### - Request for Tender - Victoria State Emergency Service

Victoria State Emergency Service is seeking a Physical Security Information Management System (access and monitoring) security solution which:

- Establishes a standardised approach to guide the direction of any future security systems/equipment upgrades and/or new security system/ equipment installations at the various SES premises.
- Acts as the central control security system that allows connectivity with the security systems and equipment across all (to the extent applicable) SES premises (13 SES offices and 149 volunteer units).
- Will provide the option for centralised management, monitoring, coordination and control of the various electronic security systems located across any of the SES premises that integrate their security systems into the central security system.
- Is scalable and flexible to provide maximum compatibility with the various types of incumbent security systems/equipment already installed at SES premises (to the largest extent possible). That is, it does not create an environment that severely restricts the type of equipment (or suppliers of equipment).
- Creates a centralised security system environment that does not create an operational nor financial impost through establishing the need for each SES premises, regardless of size, operational functions or location to undertake extensive electronic security equipment or installation upgrades.
